Programme NOVA 2023-2024 – Multidisciplinary assessment committees (MAC) choice in the FRQnet form

MAC selection in the FRQnet NOVA* form 2023-2024	Non-exhaustive description of the research areas covered by the MAC
CEM A - Chimie	Analytical Chemistry
	Physical Chemistry
	Material Chemistry
	Inorganic Chemistry
	Synthetic Chemistry
	Environmental Chemistry
	Biochemistry
	Organic Chemistry
	Protein Chemistry
	Biological Chemistry
	Food Sciences
CEM B - Environnement / Ressources naturelles / Écologie	Physical Geography Remote Sensing Atmospheric Science Environmental Geomatics Oceanography Limnology Hydrology Climatology Glaciology Agronomy Agroforestry Forest Science Environmental Engineering Geomorphology Geochemistry Mineralogy Geology Resource Geology Geodynamics Geological and Mineral Engineering Mining Engineering Animal and plant Ecology Aquatic Ecology Terrestrial Ecology Microbial Ecology Biodiversity Evolution Animal Behavior
CEM C - Sciences biologiques	Biophysics Immunology

	Genetics, genomic and proteomic Microbiology and Virology Molecular Biology Cellular Biology plants and animal Medical Biology Animal Biology Parasitology Reproduction Veterinary
CEM D - Sciences physiques / Mathématiques	Theoretical Physics Quantum Physics Condensed Matter Physics Atomic Physics Digital Physics Optical Physics and Photonics Astronomy Cosmology Planetary and Geophysical Sciences Instrumentation Applied Mathematics Mathematics Statistics Applied Statistics Biostatistics Probability Theories
CEM E - Informatique / Recherche opérationnelle / Génie électrique	Mathematical Programming Modelization, simulation Numerical Analysis Artificial Intelligence Internet Of Things Big Data Mathematical and Computational Finance Management Quantitative Methods Actuarial Science Financial Engineering Mathematical Applications in Operations Research Computer Engineering Software Engineering Electrical Engineering Electronic Engineering Telecommunication Bioinformatics
CEM F - Génie	Material physics Material Engineering Civil Engineering Mechanical Engineering Industrial Engineering Robotic Biomechanical Automated Production

	Engineering State-of-the-art Processes Product Quality Control
Autre	None of the MAC described match the research areas of your application.

*Selection for information only. Your file may be assigned to a different committee than the one selected here, without prior notice.
